Gabriel Vince

SKILLS

As a Full Stack developer with a strong background in JavaScript/Solidity, I am passionate about using blockchain technology to enhance and transform traditional business models.

I have a track record of success in building websites and decentralized web applications using frameworks like Next.js, React, and React Native. In addition to my technical skills, I am also highly skilled in user interface design, with a focus on creating beautiful, intuitive interfaces for my team.

Overall, I am a driven and dedicated team member with a strong passion for blockchain and a commitment to delivering exceptional results for my team.

PROJECTS

Buy a Biskit — *Javascript / Solidity / Next.js*

-Ethers.js -Hardhat -Next.js -TailwindCSS

- DeFi application where users can include ideas for projects and contribute ETH
